Summary

Software Engineer II with over two years of hands-on experience participating in the end-to-end development of startup companies. Throughout my career, I have been actively involved in projects spanning from the initial ideation phase to the point of achieving maturity or successful acquisition. My expertise is prominently centered around system design, with a specific focus on Microservices Architectures. I have consistently demonstrated proficiency in crafting scalable and reliable system architectures, playing a pivotal role in the growth and success of multiple startup ventures.

Experience

Lead Backend Engineer

Iknite Studio

Apr 2022 - Present (2 years)

Iknite is a forward-thinking startup studio that specializes actively in building and guiding startups through their entire lifecycle, from inception to successful exits. My tenure at Iknite has been multifaceted, encompassing roles as a Tech Lead, Agile Coach, and Lead Backend Engineer. Below is a snapshot of the achievements and impact I've made during my tenure at Iknite.

- Led the improvement of Customer Satisfaction scores by introducing a new product feature at Cliqkets, a startup company. Developed a service enabling the smooth delivery of SMS/Email notifications, leveraging AWS Simple Notification Service (SNS) and SES.
- Elevated client retention rates by 5% through the creation of an efficient and fail-safe Queue processor service. Leveraging a comprehensive set of AWS services such as ECS, ECR, Cloud Formation, CloudWatch, AWS SQS, and RDS, the service efficiently processes payments originating from client orders.
- Improved client retention rates by 5% through the development of a robust payment queue processing microservice. Utilized various AWS services such as AWS SQS and IAM roles to ensure efficient and fail-safe processing of payments from client orders.
- Achieved a noteworthy 50% increase in system scalability and a substantial 5% reduction in maintenance costs by centralizing and optimizing the company's AWS Cloud infrastructure and CI/CD architecture. This initiative significantly contributed to the reduction of overall AWS Cloud expenditures.
- Drastically improved Company's Efficiency in System Error Response time by configuring multiple

CloudWatch Alarms for recurrent system errors (an Automatic Alarm system). This strategic approach ensures immediate attention to critical issues, resulting in an impressive 50% enhancement in system reliability.

- Played a pivotal role in coaching recent and final-year graduates from universities in alignment with company culture, work ethics, communication skills, and technical proficiency. This initiative contributed to the professional development of the graduates and fostered the company's overall growth.
- Played a pivotal role in Companies growth through coaching recent and final-year graduates from universities in alignment with company culture, work ethics, communication skills, and technical proficiency. This initiative contributed to the professional development of the graduates and fostered the company's overall growth.

X Front End Software Engineer

Hourworth

May 2023 - Sep 2023 (5 months)

- Elevated the visual identity of web applications by harnessing ReactJS, Sass, and JavaScript to craft flexible and customizable UI components. The outcome was a remarkable 100% success rate in meeting acceptance criteria, contributing significantly to the enhanced branding of the web app.
- Spearheaded comprehensive research on design tickets and emerging technologies, meticulously documenting findings and insights. This proactive initiative substantially improved the overall developers' experience, facilitated informed design decision-making, refined development methodologies, and effectively reduced the overall effort required for task completion.
- Revamped HTML code to ensure strict adherence to industry and company standards, with a focus on optimizing websites for search engines (SEO) and enhancing accessibility for users with disabilities. The result was an improved search engine ranking and a more inclusive user experience, aligning the product with best practices and standards.
- Exemplified an unwavering commitment to detail by consistently upholding graphic standards and branding guidelines across all product interfaces. This steadfast dedication to uniformity culminated in a flawless 100% acceptance rate, fostering a cohesive and professional user experience across diverse interfaces.

Software Engineer - Co-Founder

BCC Technologies LTD

Aug 2021 - Jan 2022 (6 months)

Pioneered the establishment of Bcc Technologies LTD, a tech startup, alongside two associates as we approached the culmination of our college education. Our core mission was to deliver innovative software solutions targeting the optimization of bureaucratic paperwork processes within educational institutions.

- Pioneered the establishment of Bcc Technologies LTD, steering a team of two developers and one

content creator. Led the development of user stories, wireframes, and E-R Models, fostering seamless communication and alignment between front-end and back-end developers. This collaborative effort resulted in an enhanced development process.

- Orchestrated Agile development processes and Scrum meetings, achieving a remarkable 20% increase in project completion rates and a concurrent reduction in overall project costs. The embrace of Agile methodologies significantly improved efficiency and streamlined delivery timelines.
- Spearheaded the creation of monthly milestones to attain the primary Minimum Viable Product (MVP) goals for the company's product. This strategic initiative ensured a structured and measurable progression, aligning development efforts with precise business objectives.

Mobile Application Developer

New Generation Technologies, LLC

Mar 2021 - Aug 2021 (6 months)

- Gathered and analyzed system requirements to comprehensively understand stakeholder needs and ensure alignment with business objectives for successful mobile app development projects.
- Managed and coordinated cross-functional teams, fostering effective communication, skillfully delegating tasks, and diligently tracking performance to meet project deadlines and deliver high-quality mobile applications.
- Wrote clean, efficient, and maintainable code for the company's UI applications, utilizing best practices and industry standards to create visually appealing and user-friendly interfaces.
- Developed comprehensive Software Requirements Specification (SRS) documentation, meticulously outlining project scope, functionality, and technical specifications. Also, designed optimized and scalable database schemas for efficient data management.
- Actively participated in the ICT4KIDS apprenticeship program, passionately teaching coding and software engineering principles to children and inspiring them to become the next generation of skilled software engineers.

Education

HIBMAT University Institute of Buea.

Bachelor's degree, Computer Software Engineering

Oct 2020 - Dec 2021

Major in Software Development

HIBMAT University Institute of Buea.

Higher national diploma, Computer Engineering

Oct 2018 - Aug 2021

Skills

Microservices Architectures Design • Restful API Design • Go (Programming Language) • Docker • gRPC • docker • PostgreSQL • JavaScript/Typescript • React • NodeJs • MongoDB • Amazon Web Services (AWS) • Agile Coaching • Next.js • Amazon S3 • Unit Testing • Shell Scripting (Linux/Bash) • Amazon ECS • Git • Continuous Integration and Continuous Delivery (CI/CD) • MQTT •
